

Dayforce Update

What's happening?

Dayforce is the technology platform CA ANZ uses to manage our workforce, including employees, individual contractors and relevant third-party workers. It is separate to our membership database, Salesforce (which is used for different purposes).

We are already using Dayforce to support recruitment and onboarding and our next step is to use the platform for improved payroll services. The new module supports our commitment and strategy to improve your digital experience and deliver on our 2025 strategic roadmap.

As we start to load payroll data into Dayforce, **you might receive some system-generated email alerts** asking you to verify information, e.g:

We're trying to minimise these messages, but there's some email alerts that can't be turned off.

What do I need to do?

For the moment you don't need to take any action and can ignore these alerts. We'll be in touch when it's time to check your information.

What's next?

Once we've finished our technical testing we'll let you know the plans for training and implementation.

We'll also spell out which system to use for which purpose – so it's clear where and how your contact information is used.

If you have questions or concerns please contact Dayforcesupport@charteredaccountantsanz.com
